## **SUPER DUTY FITNESS EQUIPMENT**

# SuperMAX 10 Station 16 Activity Fitness System

Sit-ups (3), pull-ups (3), push-ups (4), triceps dips (4), vertical knee raise, leg lifts, step-up, parallel bars

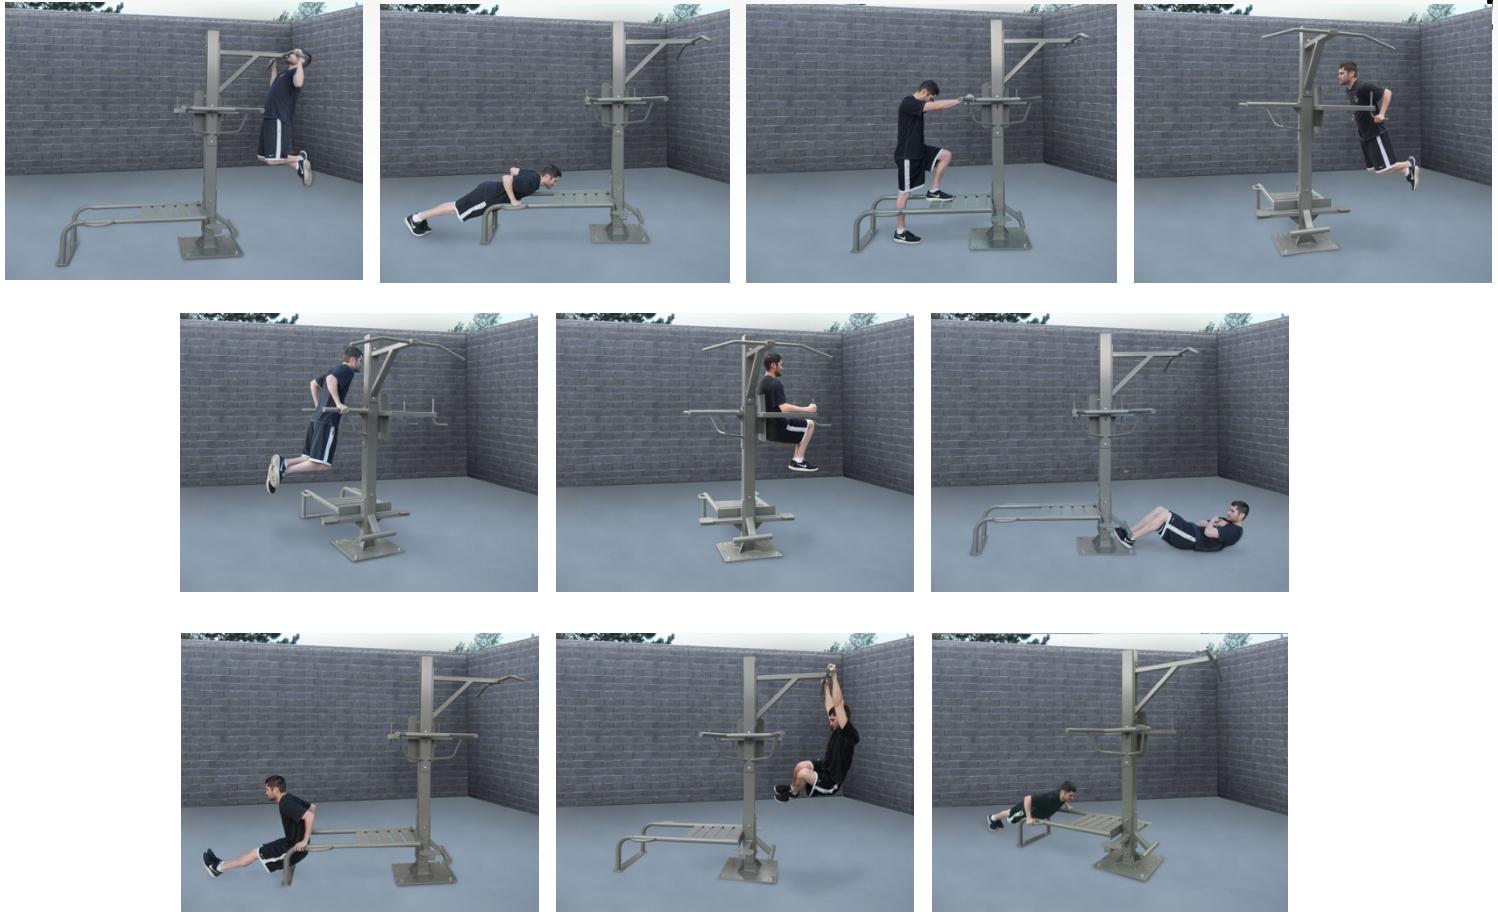

The SuperMAX 10 station 16 activity fitness center is designed to fit in a larger area than the SuperMAX 6 and will accommodate more users, the footprint is 14' x 16.5'. Like the SuperMAX 6, it is designed for industrial use where almost maintenance free equipment is required and can be ordered with tamper proof hardware. All SuperMAX equipment is designed for prison and correctional markets, police departments, fire departments and any application requiring the heaviest duty equipment available.

# SuperMAX 6 Station 10 Activity Fitness System

Push-ups (2), triceps-dip (2), pull-ups, torso twist, step-up, sit-up.

Our 6 station 10 activity standalone fitness center is the perfect choice for any high use application where limited space is available, the footprint is only 5' x 8'. Originally designed for the prison and correctional markets, it is becoming extremely popular where heavy duty, almost maintenance free equipment is needed. With stainless tamper resistant hardware and a variety of super tough finishes you have as close to a vandal and weather resistant product as you can find.

# Individual SuperMAX Individual Fitness Station

Two-person pull-up station

Four-person pull-up station

Pull-up, knee raise, triceps dip

Triceps dip and  
decline sit-up

Crunch sit-up and  
decline sit-up

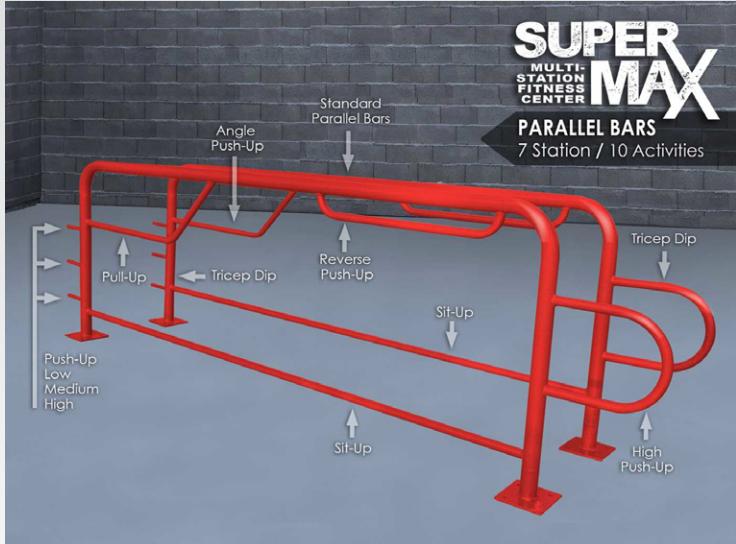

Vertical knee raise  
and triceps dip

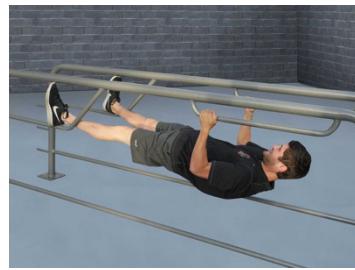

Decline sit-up and  
vertical knee raise

SuperMAX individual stations can be custom designed to fit your space, your fitness needs, and your budget. These are just a few examples of the bodyweight exercises available with the SuperMAX line of Super Duty fitness equipment. Just let us know what type of bodyweight exercise stations you require, and we will design equipment specifically for you. SuperMAX is engineered and built to the strictest standards; to hold-up where others fail.

# SuperMAX Multi-Station Parallel Bars

**Seven Individual Stations**

The most versatile parallel bars offered! One compact unit that offers 7 individual stations and 10 different bodyweight exercises. Can be installed in-ground or surface mount.

# StayFit Heavy Duty Modular Fitness Equipment

Like our SuperMAX fitness equipment, StayFIT Bodyweight+ multi-station fitness units are designed and engineered for all fitness levels, from ages 13 years and up and are perfect for applications both indoor and outdoor. With over 50 different bodyweight exercise stations, we can design a fitness center suitable for 1-30 users or more. Our fitness equipment is virtually maintenance free and carries a 25-year warranty, the best in the industry. StayFIT is the leader in modular bodyweight fitness equipment, enabling us to custom design fitness centers to fit almost any requirement.

# StayFit Heavy Duty Multi-Use Pole

StayFIT Multi-Use Poles are designed to use suspension training equipment, resistance bands and muscle/battle ropes. Tubular and flat resistance bands can be used in place of weights and machines to maintain strength and muscle mass and are one of the safest methods to increase bone strength and prevent osteoporosis. They are also used in rehabilitation and physical therapy. The use of suspension equipment, resistance bands and muscle/battle ropes provide a full body workout and help increase power, strength, flexibility, endurance and aerobic capacity. Our multi-purpose pole allows multiple users to train at the same time.

# SuperMAX Super Duty Pull-Up Bar

## SuperMAX Super Duty Fitness Equipment

SuperMAX bodyweight fitness equipment is hand made in the USA and designed specifically for use in almost any environment! SuperMAX is the perfect fitness addition for prisons, correctional facilities, military installations, police departments, fire departments, or any application where only the toughest and heaviest duty equipment will work.

SuperMAX is hand-welded using heavy steel components, thick walls, stainless steel hardware and is powder coated. Tamper resistant hardware is also available. SuperMAX has no moving parts for minimal maintenance and a 25-year warranty makes it the best product for your existing or new workout facility.

## SuperMAX Individual Stations

SuperMAX like our standard line of StayFIT outdoor fitness equipment is completely modular and can be designed to fit just about any need, price range and space requirement. The main difference between our standard StayFIT line of equipment is SuperMAX uses a much larger vertical post, 5"x5" instead of a 4"x4" post and steel slats replace the full 1"x5.5" recycled poly boards used on the sit-up stations and a few other exercise stations. Heavier pipe is used on some of the equipment to handle substantial use. SuperMAX is designed and engineered to meet the need for equipment that gets heavy and rough use, such as prisons and correctional facilities, military installations, law enforcement, fire departments, high-vandalism area or any situation where only the toughest equipment will work. SuperMAX is the closest thing to maintenance free and vandal proof equipment on the market today.

StayFIT outdoor/indoor bodyweight fitness equipment is manufactured by Pacific Outdoor Products. Pacific Outdoor Products has been manufacturing outdoor recreational equipment for 40 years in Maple Valley, Washington. Our e-mail is [sales@pacificoutdoor.com](mailto:sales@pacificoutdoor.com) and our phone number is 425-432-6000.
